

Table 6. Target pests listed on labels of insecticides for use on berry crops.

	azadirachtin	<i>Bacillus thuringiensis</i>	diazinon*	Imidan	insecticidal soap	Kelthane	lime sulfur	malathion	metaldehyde	methoxychlor	oil	permethrin	pyrethrins	rotenone	Sevin	Thiodan
STRAWBERRY, key pests																
slugs									√							
spittlebugs								√		√				√	√	√
tarnished plant bug					√			√								√
STRAWBERRY, occasional pests																
cyclamen mite			√													√
leafrollers	√	√	√					√						√	√	
spider mites			√		√	√		√						√		
strawberry leaf beetle										√						
strawberry weevil										√				√	√	
GRAPES, key pests																
grape berry moth	√		√	√						√					√	
Japanese beetle	√			√				√		√				√	√	
GRAPES, occasional pests																
grape flea beetle				√						√			√	√		
leafhoppers	√		√	√	√			√		√			√	√	√	√
rose chafer										√				√	√	
RASPBERRY/ BLACKBERRY, occasional pests																
cane borer														√		
Japanese beetle	√							√		√					√	
raspberry fruitworm														√		
rose chafer										√					√	
strawberry weevil										√					√	
BLUEBERRY, occasional pests																
blueberry maggot			√	√				√						√	√	
cherry fruitworm	√		√					√		√					√	
cranberry fruitworm			√					√		√					√	
Japanese beetle	√							√						√	√	
plum curculio				√				√		√						
scales					√										√	

* diazinon might be unavailable in some retail shops because its manufacturer is phasing it out for home garden use over the years 2001–2005.
