

ANR-0109

Nitrogen Rate Recommendation for Established Perennial Cool-Season Grass Forages Based on the Percentage of Legume in the Stand

ANR-0109-Table 11

	Yield Potential (tons/A)		
	4	6	8
Crop, Percent Legume	Annual application (lb N/A)*		
Tall grass, less than 20% legume	100	140	180
Mixed tall grass-legume, 20–35% legume	50	90	130
Mixed tall-grass legume, greater than 35% legume	0	0	0
*Make split nitrogen applications in the early spring and after the first harvest. Liquid nitrogen should be applied in early spring or immediately following forage harvest. Source: <i>Ohio Agronomy Guide, 15th Edition</i> .
